

Dear colleagues and friends,

EASAPS will have a lot to offer the European Societies for Aesthetic Plastic Surgery in the future, but to allow us to be the voice and connect us all, we do need some collaboration from you.

Regulations and tax laws are changing, and to be able to get a detailed survey on how things compare in Europe, as far as which speciality can carry out what type of aesthetic surgery, and what kind of VAT is applied in each country, we have decided to develop a detailed **questionnaire**.

The results will then be sent to all the European Associations as soon as we have received all the answers. Our goal for the future is to be as informative as possible, to discuss training and regulations on patient safety on a European level and to be the voice of our speciality in Europe.

We aim to give information to help those countries who are thinking about opening a **National Breast Registry**, by providing information regarding what is already in place in other countries.

We hope that you feel that EASAPS is your voice, **the Voice of European Aesthetic Plastic Surgery**, and we are steering in the direction of a strong Association.

Please take some time to fill out the questionnaire that will be an important part of the information that we can share with all the European Societies.

Please contact us for any other details that you may need.

Best regards,

Ivar van Heijningen
EASAPS President
