

EASAPS is founding the **European Society of Aesthetic Plastic Surgery (ESAPS)**.

We need European representation of all individual Aesthetic Plastic Surgeons emphasizing the core values of ethics, patient safety and good training.

National Societies must be promoted among all these surgeons where national interests need to be defended. If they don't have a National Society we can help them found one.

European issues such as GDPR, VAT, ALCL, facility accreditation, cross border medical travel etc are easier to address together than on our own.

Europe is strong in its diversity where we can learn from each other. EASAPS/ESAPS intends to do this, collect information and distribute to all.

### EASAPS 2018 Fellowship

EASAPS is very pleased to inform you that Vivien Moris from France, was awarded the 2018 EASAPS Fellowship. All the candidates submitted excellent motivations so we hope that we will have the opportunity to see their applications for future fellowships. There will also be a fellowship awarded for the best paper from a "young category" during our Biennial meeting that will be held in Bruges so please send your best paper, or stimulate your young colleagues to submit. The congress home-page can be found here and the link for the abstract is here.

## WWW.REALPLASTICSURGEON.EU

Already 289 individual plastic surgeons inscribed after the last newsletter. We will soon add all the Swedish and all the Portuguese plastic surgeons as their Societies have agreed to be added as a group. These doctors will get the request to add a password to their account by email. We encourage all Societies to discuss permission of adding all plastic surgeons since this website should be reliable for your country.

## ALCL

The Paris ANSM meeting concluded that a total ban of all textured implants is not advisable, so we hope that the government will follow this advise. This month the FDA will have a hearing on implants, that will be important. We will update you when we know more.
