

Dear friends and colleagues,

the world could not have anticipated what the impact the Covid-19 pandemic would have on us all! Most surgical activities were suspended and only the ones that were life essential continued to be carried out. In every country, the Health care service supplies and resources were focused on fighting the Pandemic and saving lives! Surgeons and health-care businesses were put under pressure and had to deal with going back to General Healthcare, suspending our practices and it was and still is, very difficult to maintain our staff and Clinics. The economy of many countries is already paying the price and things are not improving as fast as we hoped.

There has never been a moment in time where collaboration and sharing experiences has been more important and we are very pleased that EASAPS managed to create a community where National Societies could and can still compare what is happening in their country and if this sense of belonging was already present, it is much stronger now. We are very pleased that the first Presidents meeting will be held by webinar on November 12th. This will give a chance for all the European Societies to discuss important topics.

EASAPS are planning a future and creating even more strength for our member societies. Due to the pandemic, we had to change our Educational programs for more “virtual” content and it is still impossible to meet in person. Most Scientific societies have moved their activities and educational meetings to next year.

Due to the busy schedules of our invited speakers next year we have decided to postpone our **Biennial Meeting that will be held in Lisbon the 31st March and 1st-2nd April 2022**. The focus will be on Breast and Body Contouring and we have already a preliminary outline of the programme. We are inviting some of the most experienced International speakers. We will have a great Programme, with 2 simultaneous rooms to allow us to give an ample choice of sessions as well as including edited videos with the commentary of the operating surgeons which has always proved to be an important educational activity. This will be a great opportunity to meet personally, so keep the date in your calendar.

Warm regards

Carlos Parreira

E(A)SAPS President
